Industrial Rescue: Team Leader Training The purpose of this four-day course is to provide students with the skills and knowledge needed to effectively lead and train industrial rescue teams. The focus will be teaching the students to deliver classroom and hands-on rescue training. *The class will be held at the Titan Missile Museum, south of Tucson.*

Confined Space Train-the-Trainer Learn to train entrants, attendants and entry supervisors. Students receive a Leader's Guide, PowerPoint presentation, and student materials. The class also focuses on reclassification, hazard assessments, written programs, and rescue requirements.

Excavation Safety: Competent Person This is our Mastery-Level Excavation Safety class compressed down to two information-packed days. Topics include soil mechanics, soil testing, sloping and benching, protective systems, and safety planning.

Excavation Safety: Basic Skills This one-day class provides competent persons with updated information and also serves as an excellent introduction to excavation safety.

Fall Protection: Competent Person Falls are one of the leading causes of workplace injuries. Learn the full scope of fall hazards and discover creative means of controlling or eliminating them. Topics include fall forces, regulatory requirements, and rescue.

Cancellation Policy: Cancellations received two weeks before the first day of class are entitled to a full refund. Cancellations received one week before class are entitled to a 50% refund. All un-refunded monies can be applied toward any future D2000 classes.

Yes!
